Dam Remains
Built in 1916. Prior to the dam's construction, Freeland Lake was several meters lower
Freeland Lk
"The Crack"
A massive rock crevasse that encloses the trai passing through
Glacial Grooves
These deep, parallel grooves were carved into the rock by a moving glacier at the end of the last ice age, revealing the direction of ice flow
The Pool

LB
Gulch Hill
This was the traditional portage from George Lake to O.S.A. Lake. However, in 2016 it was closed by the park superintendent, and using it is now illegal. Anyone caught using it will be ticketed
